Don't Be Alarmed

R & D Tax Credit

TAKEAWAYS/HIGHLIGHTS

- *\$5 million revenue NYC Alarm install/monitoring company*
- *45 employees*
- *Qualified expenses for employees & outside contractors of \$580,000*
- *\$45,000 Federal R&D Tax Credit*

Our client is a NY City alarm installation and monitoring company. While most of the work is repetitive, they do have some challenging projects that consume valuable resources.

Technicians, engineers & designers review challenges such as:

- Signal interference within panels
- Compatibility and integration with neighboring and associated systems
- Installation issues to overcome load bearing walls, concrete walls with rebar where long wire runs with multiple bends and interference points need to be overcome

In addition to these challenges, they also need to consider tenant disruption within the building & for neighboring facilities. Necessary pre-planning & design is considered prior to installation.

While consuming internal resources of technically skilled employee's talents, the client also hires specialists in Engineering Design & CAD to assist in meeting specific NYC code requirements.

Don't be alarmed in seeing if the R&D tax credit can be a part of your income tax savings strategy. Feel free to contact us for a free review.
