R&D Tax Credit

TAKEAWAYS/HIGHLIGHTS

- *NJ Manufacturer of various Connectors and Fittings*
- *\$50 million revenue and over 150 employees*
- *\$150,000 federal income tax savings this year and moving forward*

Big win for a New Jersey manufacturer of various metal and plastic fittings and connectors this year: a **\$150,000 federal R&D tax credit**—earned through the everyday engineering, tooling, and production problem-solving that keeps their 150+-person operation innovating.

With over **\$50M in annual revenue**, this team is constantly refining and trying new materials, improving product performance, tightening tolerances, and upgrading processes. The IRS recognizes that as real R&D, and the credit reflects it.

The best part? This isn't a one-off. If they keep innovating—and they will—this credit is likely to remain a reliable annual benefit. It's also worth mentioning that this took a few hours so there was no disruption to the fast-paced business environment.

Are you in a market where margins are tight and expectations keep rising?

Turning innovation and process improvements into tax savings is a strategic advantage. Contact us for a free review to see if we can plug you in for savings.
